Subject: PCB Storage Application and Addendum for Solidification

Jim,

I am sending this email to confirm that the following items are needed to complete the processing of your PCB Application. I would like to set up a call with you for next week sometime to discuss #2 on the list below. I just want to go over what should be in this Addendum/Revision. Would Tuesday work for you? If so, how about 10:30 AM Central Time?

1. Appendix 12, Training Plan
2. Addendum or Revision of PCB Storage Application to include Application for a 761.61(c) Approval to solidify PCBs
3. Signed certification statement for updated Application
4. Submittal of Updated Application with Addendum/Revision for solidification activities and signed certification, to the EPA Acting Regional Administrator, Robert Kaplan (per the TSCA regulations)
